### Description

#### **DESCRIPTION:**

**243-08 HP MODELS** are available with pressure ranges with 3-6.5 PSI and 6-10 PSI. (New Line) The Model 243 service regulator is a large capacity industrial service regulator designed for commercial, industrial, and gas distribution use. As a result of the union connection between the fully interchangeable bodies and the diaphragm case, they have remarkable field versatility. They are easy to install, adjust, inspect, and service in all piping arrangements. The model 243 can be used in a variety of applications such as: factories, foundries, district regulator stations, commercial laundries, and all types of gas fueled equipment including boilers, burners, furnaces, ovens, heaters, kilns, and engines. 8" diaphragm. 243 Service regulator. Orifice and spring available and included with price.
